"The Veracode Verified program provides a level of confidence to our customers when they deploy our solution. It gives them peace of mind that the product has been well tested and there are no med um or high-level vulnerabilities in the code."

Gautam Roy
Automation Anywhere
Head of Product Marketing, Security

Founded in 2003, Automation Anywhere is a global enterprise software company that has quickly made a name for itself in the robotic process automation (RPA) space, gaining thousands of customers, including Global 2000 and Fortune 100 businesses, in more than 90 countries.

Challenge

Automation Anywhere enables businesses to configure "bots" to automate processes. The bots need to be able to access company and client data, which means Automation Anywhere needs to have extra security measures in place.

Solution

- Verified program with a blueprint to achieve the highest-level of AppSec.
- Responsive and customer centric.
- Easy to start and scale.

Results

- Earned the Verified Continuous tier — Veracode's highest security level – and now leverages security as a competitive advantage.
- Automated its application security tests for real-time results.
- Launched the first-ever cloud-generated RPA platform, Enterprise A2019.
